Design Review 3 - 4/12
Peer Review 3 - 4/13
UGRADS poster - 4/20
UGRADS - 4/27
Finished Team Website - 4/27

<u>Agenda</u>
Task Report
Upcoming deliverables and presentations

<u>Minutes</u>
Software Testing Doc, due next Tuesday
     No draft for this one, so we can send it to Ana before Tuesday for her to review instead.
     Not a really hard due date for Tuesday, she is okay with turning it in later in the week.
     Do submit on BbLearn on Tuesday, but she is okay with us changing it and turning in later in the week.
     Looking for a really structured document, tracing success for each requirement test
     Should outline EACH step of the tests for the user to see a successful outcome.
     Describe each event that needs to happen to reach success, and each alternative flow that can happen, that can lead to errors

Capstone Presentation
     We will have a dry run before the conference, showing the exact same presentation that we will have there, to Ana. Ana will grade our presentation at the conference.

Task Report
     Alex showed the updated Team Website
     Nobody had anything else to show
